Move Out: The 70 Million Pound Problem
Move In: The $30 Million Oversight

- Move-out: 70 million lbs of completely usable dorm essentials are thrown away each year

- Move-in shops are a $30 million opportunity that schools are choosing to forgo

- 2000 US schools with on campus housing
  - Only 150 with dorm reuse program

- How can this be in an environment where:
  - Waste hauling costs up 56%
  - Student move-in costs averaging $1600

Status-quo “Dorm Reuse” is hard. We know - we’ve done it!

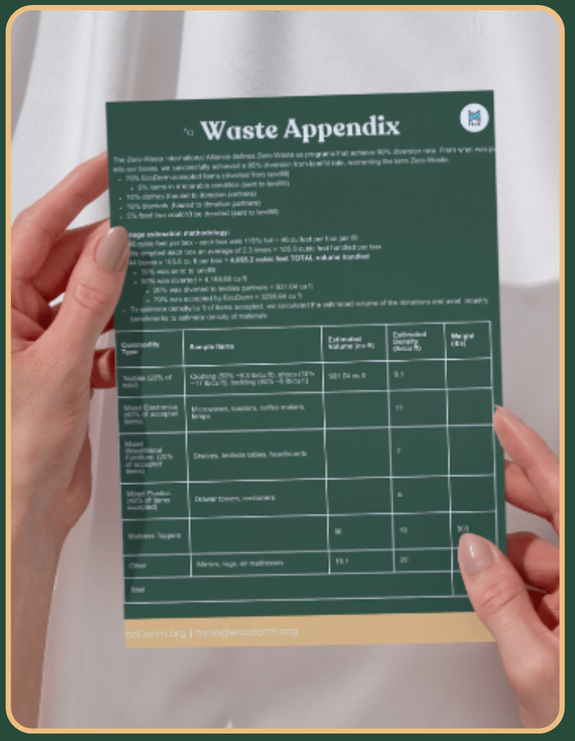

Move-out bottleneck = impossible to track inventories.

Move-in chaos = “Break-even” profits.

Lack of systems means reinventing the wheel every year.

After everything, all you’re left with are cool photos and guesstimates.

Insights to Making Dorm Reuse Mainstream

People pay for peace of mind.

Inventory is everything. Its also the hardest part.

You can only manage what you can measure.

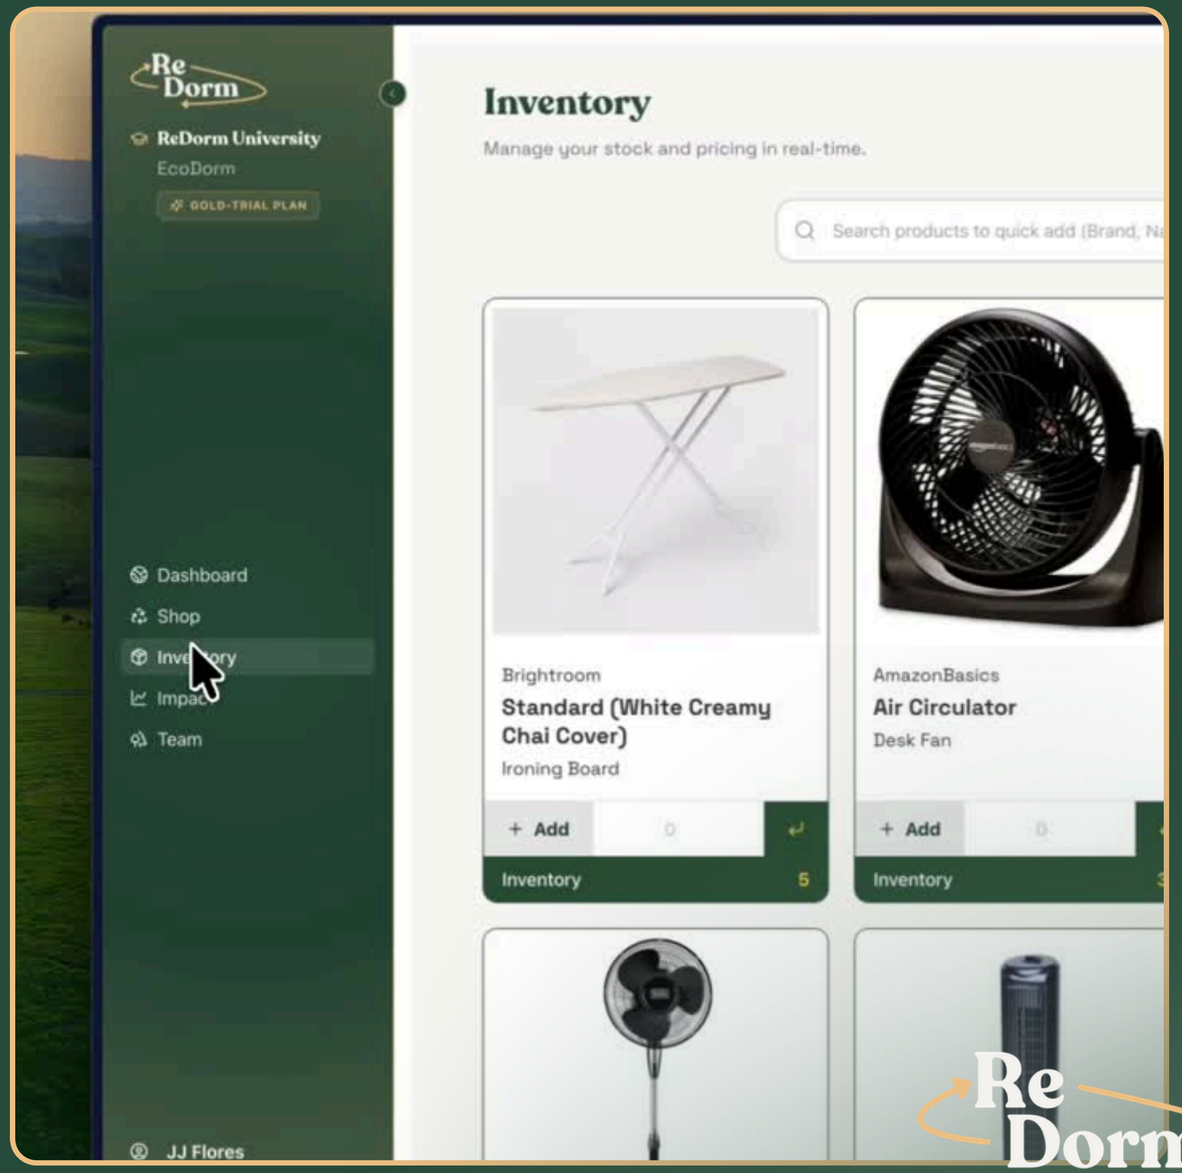

Cut inventory time from 5 minutes to 5 seconds

200+ dorm essentials in our inventory database (and counting)

- *No other e-commerce site comes equipped with our growing LCA database*

Just search by brand, category, or even barcode!

Barcode printing and uploading custom products coming soon

Instantly see scientifically accurate impact data

Go AASHE STARS Platinum and have UN SDG learning opportunity with our built-in checklists

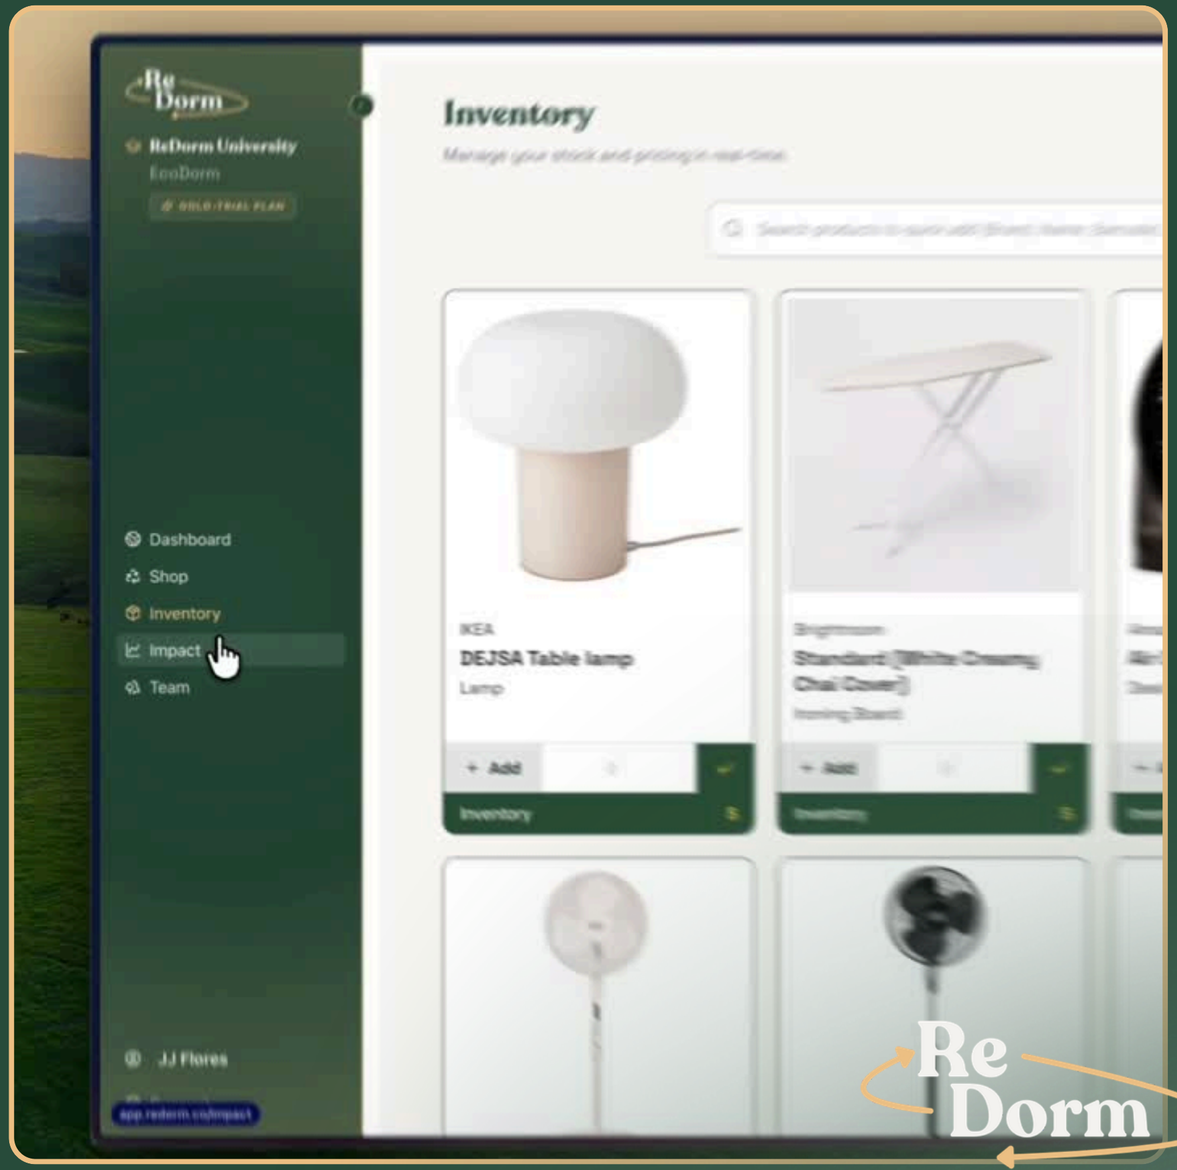

See metrics like

- kgCO2e displaced
- Lbs diverted
- Material breakdown
- Category/brand/source insights

Download impact reports

Data gets better with time (open-source methods)

Track to custom goals!

Drive higher revenue with student re-commerce

Design white-labeled shop

Change shop status throughout the year (pre-order, active, inactive)

Built hype with pre-order countdown!

Set custom pickup time, dates, and locations

Set custom payment provider
(CashNet, NelNet, TransAct, CampusPay)

Split revenue among departments
